

ELECTROMAN

KEEPING YOU PRECISE & POWERED.

CORPORATE PROFILE

Doha, Qatar

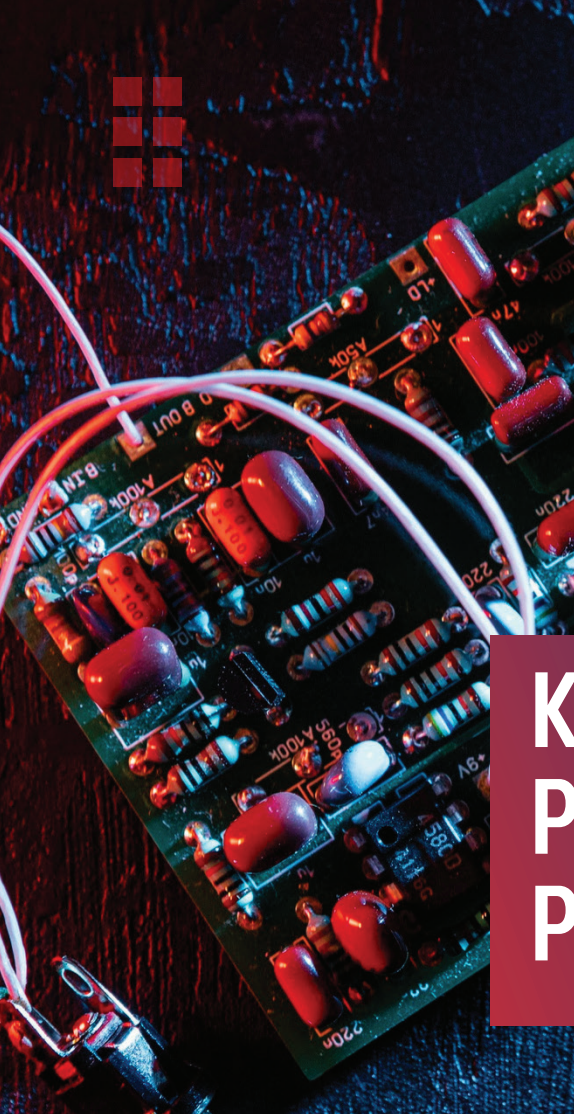

www.electromanqatar.com

**Uptime Guaranteed.
Reliability Delivered.**

www.electromanqatar.com

At Electroman, we are a team of highly skilled engineers, technicians, and industry experts dedicated to providing innovative electro-mechanical solutions. Our customer-centric approach, combined with state-of-the-art technology, ensures that businesses across Qatar receive reliable, efficient, and cost-effective engineering solutions. We specialize in automation, energy management, building maintenance, and power distribution, catering to industries of all sizes.

As a Qatar-based electro-mechanical service provider, Electroman is committed to supporting the country's infrastructure, industrial, and commercial growth. We align our expertise with Qatar's National Vision 2030, focusing on sustainable development, smart technology integration, and energy-efficient solutions. Our team works closely with businesses to enhance their operational efficiency, optimize energy consumption, and implement future-ready solutions.

Keeping you Precise & Powered.

ABOUT THE
COMPANY

www.electromanqatar.com

OUR MISSION

To empower businesses with advanced electro-mechanical engineering solutions that optimize performance, improve energy efficiency, and enhance operational safety. We strive to deliver high-performance, sustainable, and innovative services that drive growth and success.

OUR VISION

To be Qatar's most trusted electro-mechanical service provider, recognized for cutting-edge technology, superior quality, and long-term client relationships. We aim to revolutionize industries with automation, energy-efficient solutions, and seamless system integration.

www.electromanqatar.com

Smart Solutions. Strong Support. Every Time.

WHY CHOOSE
ELECTROMAN

www.electromanqatar.com

By embracing real-time insights and user-driven feedback, we ensure every service touchpoint delivers value – whether local or offshore. Our solutions are always a step ahead, engineered for performance and reliability.

- **Expertise & Precision**

Experience in delivering top-tier electro-mechanical solutions.

- **Sustainable & Energy-Efficient Solutions**

We integrate the latest advancements in power management and energy conservation.

- **Cutting-Edge Technology**

From smart automation to IoT-enabled monitoring systems, we bring the future of electro-mechanical engineering to your business.

- **Proven Industry Experience**

Successfully catering to industries such as manufacturing, construction, retail, corporate buildings, and more.

- **24/7 Support & Reliability**

Dedicated teams available around the clock to minimize downtime.

Motors and Drives, Motor Control

- Energy-efficient motor systems designed to reduce operating costs.
- VFD (Variable Frequency Drive) solutions for better control and energy optimization.
- Custom motor control systems for industrial processes and machinery.
- Preventative maintenance programs to ensure longer motor life and minimize failures.
- VFD chip level service for reducing the maintenance cost.

First time in Qatar

**Smarter VFD Service.
Lower Maintenance Costs.**

Power Distribution and Power Management

- Comprehensive power distribution systems for safe, efficient electrical distribution.
- Load analysis and optimization to ensure balanced power distribution across facilities.
- Energy management solutions to reduce costs and enhance system performance.
- Backup power systems to ensure continuous operations during power outages.

SIMATIC Controllers

- Advanced PLC-based automation for precision-driven industrial processes.
- Custom programming, troubleshooting, and support for automation systems.
- SCADA integration for real-time monitoring and control.

Digitalization

- IoT-enabled smart factory solutions for real-time data insights.
- Integration of hardware software, and cloud systems for efficient
- Smart building automation for enhanced control and efficiency.

A background image for the 'Automation & BMS' section showing two blue robotic arms positioned over a workbench on a factory floor.

Automation & BMS

- Smart building automation solutions to control HVAC, lighting, security, and more.
- Integration of energy-efficient systems for optimized building operations.
- BMS installation & monitoring to ensure streamlined building functions.
- Custom automation solutions to improve productivity and reduce operational costs

A background image for the 'System Integration' section showing a dense bundle of multi-colored network cables (red, green, blue, yellow) plugged into a server rack.

System Integration

- Seamless integration of electrical & mechanical systems for better performance.
- Optimized control systems to enhance process efficiency.
- Customized solutions to meet industry-specific requirements.

Plumbing System Installation and Maintenance

- Expert plumbing installation for industrial, commercial, and residential facilities.
- Scheduled maintenance to ensure plumbing systems are functioning optimally.
- Leak detection and repair services to minimize downtime and operational disruption.
- Plumbing system upgrades to improve efficiency and reduce water wastage.

Preventive Maintenance Services

- Scheduled maintenance programs for all electrical and mechanical systems.
- System inspections to identify potential issues before they become critical.
- Performance optimization through regular checkups and fine-tuning.
- Comprehensive reports detailing maintenance activities and system performance.

HVAC System Installation & Maintenance

- Energy-efficient HVAC systems for optimal heating, ventilation, and air conditioning.
- Professional installation of HVAC systems tailored to business requirements.
- Regular maintenance services to ensure HVAC systems function at peak efficiency.
- System upgrades and repairs to extend the lifespan of HVAC equipment.

Lighting Solutions

- Complete indoor and outdoor lighting solutions tailored to commercial, industrial, and residential spaces.
- Energy-efficient LED lighting installation and retrofitting for reduced power consumption.
- Smart lighting integration with motion sensors, timers, and automation systems.
- Professional design, layout, and lux level planning to ensure optimal illumination and aesthetics.
- Repair of LED lights
- Stretch Ceiling Solutions.

CCTV Installation & Maintenance

- High-definition CCTV systems for enhanced security and monitoring
- Installation and integration of surveillance systems with existing infrastructure.
- Ongoing maintenance to ensure the reliability and efficiency of CCTV systems.
- Real-time remote monitoring solutions for businesses and industrial sites.

Field Services

- Regular and emergency electrical and mechanical maintenance.
- System inspections, diagnostics, and repair services to prevent downtime.
- 24/7 support for critical infrastructure and industrial plants.

Solar Solutions

- End-to-end solar energy solutions, including design, supply, and installation for residential, commercial, and industrial needs. End-to-end solar energy solutions, including design, supply, and installation for residential, commercial, and industrial needs.
- Customized solar panel systems to optimize energy efficiency and meet site-specific requirements.
- Regular maintenance and performance checks to ensure maximum energy output and system longevity.
- Integration with existing electrical infrastructure and backup systems for seamless energy management.

Energy Audits

- Comprehensive energy assessments to identify areas for efficiency improvement
- Detailed reports outlining energy consumption patterns and cost-saving opportunities.
- Energy-saving recommendations tailored to your specific business needs.
- Implementation of energy-efficient solutions to reduce costs and carbon footprint

Operation & Maintenance Service

- Comprehensive operation and maintenance (O&M) services for smooth business operations.
- Round-the-clock support for industrial and commercial facilities.
- Scheduled inspections to ensure systems remain in peak operating condition.
- Troubleshooting and repairs to address any operational issues promptly.

- Electrical and Mechanical Support for Oil & Gas Facilities
- Maintenance, Safety Systems & Specialized Installations

Oil & Gas Sector Services

Engineering & Technical Support

- Expert engineering support for all electro-mechanical systems, ensuring high performance
- Custom design services for tailored solutions to meet project specifications.
- System troubleshooting and problem-solving to maintain operational continuity.
- Project engineering support from conception to completion.

**Smart Lighting Solutions.
Bright, Efficient, Reliable.**

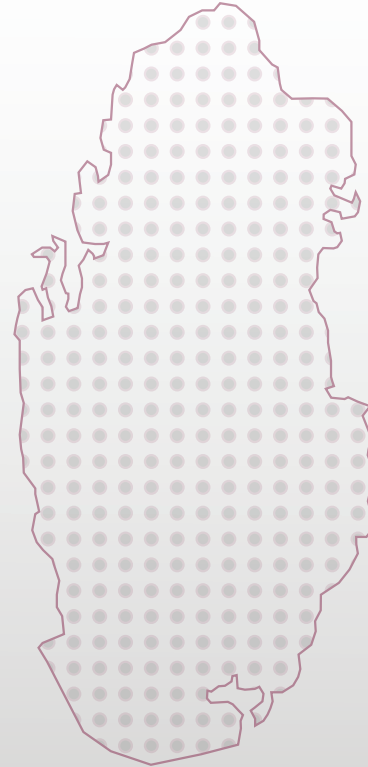

**For Sales Enquiries
+974 7448 4890**

- Dealers in all kinds of lighting solutions from famous brands.
- Repair of LED lights available.
- Strech Ceiling solutions are available.
